PROFESSIONAL SUMMARY

Solution Engineer with 5 years in B2B enterprise logistics SaaS (TMS, OMS, WMS, LMS), moving into product management. Hands-on in customer discovery, PRDs, acceptance criteria, prioritization (RICE), product metrics and API integration design. Cut feedback-to-release cycle time by **~20%** by turning recurring customer issues into specs and roadmap input, and delivered **100+ integrations** across ERP, carrier and third-party systems. Targeting Associate PM and PM roles in B2B SaaS, logistics and AI.

SKILLS

Product Management: Product Discovery, Customer Discovery, User Research, JTBD, PRDs, Roadmap Planning, Prioritization (RICE), Product Metrics, Experimentation, Prototyping, GTM, Stakeholder Management, Cross-functional Collaboration

Technical: REST APIs, Webhooks, Solution Architecture, Systems Integration, ETL, JSON, Postman, SQL (MySQL, BigQuery), Python, JavaScript, Git, GCP, AWS, UAT / SIT, Go-Live Readiness, Hypercare

Data and AI: Power BI, Apache Superset, Grafana, KPI Design, Funnel Analysis, LLMs, RAG Concepts, Prompt Engineering, Claude, Lovable, GenSpark

PROFESSIONAL EXPERIENCE

Solution Engineer | FarEye Technologies | Noida, India **2024 to Present**

Enterprise logistics SaaS, SEA and GCC clients. Informal lead for the Solutions Engineering team.

- Reduced feedback-to-release cycle time by **~20%** by converting recurring customer issues into structured product proposals, acceptance criteria and roadmap inputs for Product and Engineering.
- Shipped **5 product features** from a gap register built on customer SOPs: Confiscated by Customs event, Force Majeure marking, automated rack assignment, IsBulky classification and PUDO workflows.
- Architected the sorting-machine to TMS integration from scratch and unified **2 shipment journeys** (domestic and international) into one architecture: API contracts, barcode exception handling, reconciliation logic, peak-load testing.
- Automated **95%+** of recurring BPM tasks and cut support-ticket volume by **~10%** with SQL dashboards on sort accuracy, routing efficiency, SLA performance and PUDO adoption.
- Delivered **zero misrouting** in the Postal Flow hub removal and an **incident-free** Citylink launch through SIT, UAT, load testing on live production data and daily hypercare, resolving every anomaly the same day.
- Defined requirements, business rules and acceptance criteria for a self-service rate card and billing dashboard that replaced manual rate calculations, and made rate card testing a mandatory gate before integration testing.
- Improved post-launch order accuracy for Asyad Express by analysing usage data, identifying order-flow drop-offs and translating adoption gaps into roadmap improvements.

Associate Solution Engineer | FarEye Technologies | Noida, India **2022 to 2024**

- Resolved **~90%** of production incidents within SLA by analysing application logs, API behaviour and workflow failures, coordinating fixes with Product, Engineering and client teams.
- Led discovery sessions and technical demonstrations across SEA and GCC that translated prospect workflows into solution approaches and supported enterprise deal conversion.

Graduate Engineer Trainee | FarEye Technologies | Noida, India **2021 to 2022**

- Cut manual invoicing effort by **60%** and reduced reconciliation errors by mapping client workflows to platform capabilities and automating invoicing logic; delivered **10+** custom client solutions.

PRODUCT PROJECTS

Navigator, AI Capability Intent Routing | NextLeap PM Fellowship **2026**

- Ran primary research with **25** Claude Pro and Team users: **22 of 25** failed their first try or gave up choosing between Agents, Projects and Prompts, and only **3** felt fully confident in their choice.
- Scored 3 concepts with RICE and chose intent routing (**160** vs 35 and 28); designed a 5-stage MVP journey with Task-Fit Confidence Uplift as North Star; built a working prototype: knack-route.lovable.app.

FELT, AI-Native Gifting | NextLeap PM Fellowship **2026**

- Ran primary research with **31** respondents (only **4** fully confident in their last gift choice), reframed the job from discovery to confidence, scored **8** candidate features to scope a 3-feature MVP, and built a working prototype.

EDUCATION AND CERTIFICATION

B.Tech, Computer Science and Engineering | Chitkara University | Rajpura, Punjab | CGPA 8.8 / 10 **2022**

Product Manager Fellowship | NextLeap **2026**
